

**Albany Middle School
Single Plan for Student Achievement, 2011-2013**

**School Goal Number ONE: English Language Arts
“All Students will demonstrate growth”**

Introduction: The following goal number ONE is designed to address the perspective that we should follow cohorts of students and measure their growth from one year to the next. This perspective recognizes academic growth from one grade level to the next grade level. It's important to recognize that each grade level STAR exam is built upon the standards at that grade level. Therefore, as a student progresses from one grade to the next and demonstrates Basic, Proficient, or Advanced levels of performance; they demonstrate growth.

Goal number ONE: Albany Middle School students will demonstrate growth toward achieving grade-level proficiency in English Language Arts as measured by comparing students' achievement on the STAR from one year to the next. In this goal, growth is defined as maintaining or increasing Basic, Proficient, or Advanced levels of performance from one grade to the next. In this goal, we follow cohorts of students.

<p>Student groups and grade levels to participate in this goal</p> <p>All students in Sixth, Seventh, and Eighth grades grouped in a variety of ways:</p> <ul style="list-style-type: none"> • Grade level • Ethnic groups • Sub groups (SPED, SED, ELL) 	<p>Anticipated annual performance growth for each group</p> <p>90% of students will make at least one year's growth as demonstrated by maintaining or increasing their performance on their current grade level STAR exam as compared to their previous grade level STAR exam.</p> <p>Students who demonstrate growth from FBB to BB will be considered students who made growth.</p> <p>Students who maintain FBB or BB will not be considered students who made growth.</p>
<p>Means of evaluating progress toward this goal</p> <ul style="list-style-type: none"> • We recognize that currently, we have very limited methods for evaluating progress in the interim periods. We have no periodic benchmark exams that all students take that directly correlate to the test formats of the STAR Exams. The development of these exams may become an action step we take this year in pursuit of our long-term goals. • We can review report card grades in English Language Arts. However, current report card grades are not exclusively a demonstration of standards-based learning. The calculation of grades includes other factors such as participation, homework completion, attendance, and other areas of responsible behavior. 	<p>Group data to be collected to measure academic gains</p> <p>We will analyze data on the STAR test scores from the previous year (2011) to the current year (2012). We will identify the following statistics:</p> <ul style="list-style-type: none"> • # of students who maintained Basic, Proficient or Advanced. • # of students who increased their performance from any level Far Below Basic, Below Basic, Basic, or Proficient to the next level. • # of students who increased their performance as measured by lexile scores. • # of students who did not increase their performance levels • # of students who decreased their performance levels
